

Click to Learn Learn & Click

ANGLER e-Learn or Online learning, is an increasingly important element in learning and skills delivery. It provides the facility to deliver learning over the Internet or via your intranet, integrated with your tutoring, learner support and management processes. Already many learning providers employ e-Learning as an integral part of their overall learning provision - blended with traditional modes of learning - to widen access, increase flexibility, offer more personalized programs and enable cross-sector collaboration.

ANGLER e-Learn provides some exciting new possibilities for the training department. But really taking advantages of them will, in most cases, require a radical review of available competencies and also an upgradation of skill programs. These programs are primarily aimed at the principal job roles of e-learning manager, developer and e-tutor. ANGLER e-Learn enables rapid e-learning deployment and maintenance from a single point.

Features

- Housekeeping features
- Online course materials and Online Test
- Performance Evaluation
- Providing valuable tips
- Online Support from Tutors
- Interactive Modules like Chat, e-Discussion Forum
- Online fees payment for courses
- Online payment of course of fees

Benefits

- Learning is self-placed and gives students a chance to speed up or slow down as necessary
- Learning is self-directed, allowing students to choose content and tools appropriate to their differing interests, needs, and skill levels
- Designed around the learner
- Geographical barriers are eliminated, opening up broader education options
- 24/7 accessibility makes scheduling easy and allows a greater number of people to attend classes
- Potentially lower costs for companies needing training, and for the providers

Applications

- Web based training
- Computer based training modules
- Virtual Classrooms

Industries

- Universities
